DETAILED ACTION

This Office Action is in response to the Amendment filed on November 12, 2004. Amendment to the specification is acknowledged. Claims 1-2, 8-9, and 12 were amended; claims 13-14 were added; and claim 10 were cancelled.

Information Disclosure Statement

The examiner did not initialize the IDS, filed on August 03, 2004 and mailed on August 27, 2004. A corrected and initialized copy of the IDS (filed on 08/03/2004) is attached hereto.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: None of the cited prior art alone or in combination teaches the claimed combination of a control apparatus for an internal combustion engine having a supercharger, a geometry variable turbocharger, and a bypass passage including:

" Regarding claims 1 and 14:

a variable geometry turbocharger being downstream of the supercharger connected to the intake passage; and a control portion controlling an area of an inlet opening portion through which exhaust gas flows into a turbine of the variable geometry turbocharger, wherein the control portion prohibits the area of the inlet opening portion, through which exhaust gas flows into the turbine, from becoming a minimum when supercharging is performed using the motor.

Regarding claims 2 and 12:

the driving time decision portion starts to drive the flow amount adjustment device so as to close the bypass passage when the amount of intake air flowing through the supercharger becomes equal to the amount of intake air flowing through the bypass passage after supercharging by the supercharger is started."

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
